SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2006-2010 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Subject	Glenville town, Schenectady County, New York			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	11,367	+/-314	11,367	(X)
Family households (families)	7,540	+/-238	66.3%	+/-2.4
With own children under 18 years	3,249	+/-200	28.6%	+/-1.8
Married-couple family	6,179	+/-256	54.4%	+/-2.6
With own children under 18 years	2,428	+/-180	21.4%	+/-1.7
Male householder, no wife present, family	332	+/-112	2.9%	+/-1.0
With own children under 18 years	190	+/-83	1.7%	+/-0.7
Female householder, no husband present, family	1,029	+/-158	9.1%	+/-1.4
With own children under 18 years	631	+/-151	5.6%	+/-1.3
Nonfamily households	3,827	+/-345	33.7%	+/-2.4
Householder living alone	3,247	+/-327	28.6%	+/-2.4
65 years and over	1,511	+/-190	13.3%	+/-1.5
Households with one or more people under 18 years	3,480	+/-196	30.6%	+/-1.8
Households with one or more people 65 years and over	3,373	+/-206	29.7%	+/-1.6
Average household size	2.54	+/-0.06	(X)	(X)
Average family size	3.16	+/-0.08	(X)	(X)
RELATIONSHIP				
Population in households	28,842	+/-277	28,842	(X)
Householder	11,367	+/-314	39.4%	+/-1.0
Spouse	6,206	+/-281	21.5%	+/-1.0
Child	9,309	+/-402	32.3%	+/-1.4
Other relatives	789	+/-199	2.7%	+/-0.7
Nonrelatives	1,171	+/-234	4.1%	+/-0.8
Unmarried partner	741	+/-173	2.6%	+/-0.6
MARITAL STATUS				
Males 15 years and over	11,256	+/-355	11,256	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

- 1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
 - 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
 - 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- 6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
 - 8. An '(X)' means that the estimate is not applicable or not available.
