DP03	SELECTED ECONOMIC CHARACTERISTICS
	2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	East Nassau village, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
EMPLOYMENT STATUS				
Population 16 years and over	552	+/-159	552	(X)
In labor force	421	+/-145	76.3%	+/-7.8
Civilian labor force	421	+/-145	76.3%	+/-7.8
Employed	399	+/-141	72.3%	+/-8.5
Unemployed	22	+/-20	4.0%	+/-3.5
Armed Forces	0	+/-12	0.0%	+/-5.7
Not in labor force	131	+/-44	23.7%	+/-7.8
Civilian labor force	421	+/-145	421	(X)
Percent Unemployed	(X)	(X)	5.2%	+/-4.6
Females 16 years and over	263	+/-76	263	(X)
In labor force	183	+/-65	69.6%	+/-10.4
Civilian labor force	183	+/-65	69.6%	+/-10.4
Employed	172	+/-64	65.4%	+/-10.8
Own children under 6 years	12	+/-11	12	(X)
All parents in family in labor force	3	+/-5	25.0%	+/-38.4
Own children 6 to 17 years	127	+/-84	127	(X)
All parents in family in labor force	107	+/-81	84.3%	+/-15.5
COMMUTING TO WORK				
Workers 16 years and over	389	+/-141	389	(X)
Car, truck, or van -- drove alone	339	+/-138	87.1%	+/-7.1
Car, truck, or van -- carpooled	34	+/-23	8.7%	+/-6.1
Public transportation (excluding taxicab)	0	+/-12	0.0%	+/-8.0
Walked	4	+/-9	1.0%	+/-2.3
Other means	0	+/-12	0.0%	+/-8.0
Worked at home	12	+/-12	3.1%	+/-3.3
Mean travel time to work (minutes)	32.0	+/-3.4	(X)	(X)
OCCUPATION				
Civilian employed population 16 years and over	399	+/-141	399	(X)

Subject	East Nassau village, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Management, business, science, and arts occupations	122	+/-41	30.6%	+/-12.0
Service occupations	85	+/-65	21.3%	+/-11.6
Sales and office occupations	112	+/-58	28.1%	+/-7.7
Natural resources, construction, and maintenance occupations	34	+/-27	8.5%	+/-5.6
Production, transportation, and material moving occupations	46	+/-30	11.5%	+/-7.5
INDUSTRY				
Civilian employed population 16 years and over	399	+/-141	399	(X)
Agriculture, forestry, fishing and hunting, and mining	2	+/-4	0.5%	+/-1.0
Construction	25	+/-23	6.3%	+/-5.2
Manufacturing	12	+/-14	3.0%	+/-3.4
Wholesale trade	25	+/-24	6.3%	+/-5.6
Retail trade	83	+/-68	20.8%	+/-12.6
Transportation and warehousing, and utilities	32	+/-23	8.0%	+/-5.7
Information	2	+/-4	0.5%	+/-1.0

65 years and over	(X)	(X)	0.0%	+/-34.1
People in families	(X)	(X)	1.2%	+/-2.2
Unrelated individuals 15 years and over	(X)	(X)	0.0%	+/-28.0

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2008-2012 American Community Survey

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

02/03/2014

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
